Marcell Varga

UX & Frontend Engineer

UX & Frontend Software Engineer with expertise in UX/UI design and end-to-end application development. Combining frontend craftsmanship with backend proficiency to build scalable, user-centric solutions.

Adept at bridging design and development in cross-functional teams, with a track record of delivering projects from concept to deployment.

Experience

UX & Frontend Engineer — Oct 2022 - Present
AXON Networks

- Contributing to AXON Orchestrator development, focusing on UX/UI design and frontend development within cross-functional teams.
- Creating interactive prototypes and established design system for in-house development.
- Integrating AI/ML solutions with relating technologies into products, enhancing functionality.
- Developing RESTful APIs using Node.js/Express to support frontend functionalities.
- WCAG 2.2 accessibility principals applied across portfolio

UX Designer Intern — Jan 2022 - Apr 2022
MapsPeople

- Enhanced Maps Indoors CMS through research and development of interactive, animated prototypes.
- Executed tasks via Jira, including project management and documentation.
- Leveraged the company Design System, contributing to its evolution.
- Prioritized delivery efficiency using Auto-Layout.
- Designed cross-platform solutions for both desktop and mobile, with a focus on accessibility.
- Acquired interdisciplinary skills working within a SaaS company team.

Education

Multimedia Design AP — Aug 2020 - June 2022
University College of Northern Denmark

- UX/UI Design and Elective Specialization: Focused on enhancing UI/UX design skills through practical projects. This aligns with the importance of a well-crafted website or app for user satisfaction.
- Front-End Web Development: Engaged in hands-on experience building applications. Emphasis was placed on the design-to-code process and creating visually appealing, easy-to-use interfaces.
- Content Production: Involved in creating content that meets user needs and ensures a positive user experience. This reflects the ongoing process of UX design.
- Collaboration and Project Management: Worked collaboratively with real companies within Reflective Practice-based Learning (RPL). Applied user research methodologies and usability testing to improve product functionality.
- Reflective Practice-based Learning: Executed projects in collaboration with real companies. Applied UX/UI design principles to real-world challenges, enhancing the design-to-code process.
