SUMMARY

UX & Frontend Engineer with 4 years of experience designing and shipping production software for complex B2B platforms. Combines product thinking, interaction design, and React/TypeScript engineering to deliver data-intensive interfaces and end-to-end product features integrating frontend interfaces with backend services.

EXPERIENCE

UX & Frontend Engineer

AXON NETWORKS

OCT 2022 - PRESENT

- Designed and implemented a configurable analytics workspace, enabling users to customize monitoring dashboards through rearrangeable components and persistent views.
- Translate customer feedback and product requirements into React/TypeScript workflows, shaping interaction design and iterative improvements across AXON's Operator-as-a-Service platform.
- Build data-intensive interfaces for diagnostics, performance monitoring, and agentic AI workflows, including health checks, historical trends, and equipment insights.
- Develop reusable React components and design-system patterns across modular frontends using Webpack, Module Federation, and single-spa.
- Contribute to Node.js/Fastify and Go APIs for saved analytics views, including PostgreSQL persistence, ownership checks, and regression tests.
- Implement accessible, responsive interfaces with keyboard navigation, screen-reader support, semantic chart tables, and focus management aligned with WCAG 2.1.
- Enabled internationalization across translated interfaces, locale-aware formatting, text expansion, and right-to-left layouts.
- Contributed to AXON OaaS, recognized as Most Innovative Cloud Product or Solution at the 2025 Leading Lights Awards.

UX Designer Intern

MAPSPEOPLE

JAN 2022 - APR 2022

- Conducted UX research and built interactive prototypes for the MapsIndoors CMS, translating findings into product improvements.
- Contributed design-system patterns and responsive interfaces, documenting designs and collaborating with engineers on developer handoff.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, Redux, HTML, CSS, D3.js, Svelte

Architecture & Design Systems: Design Systems, Module Federation, single-spa, Webpack

Backend & Integration: Node.js (Fastify/Express), Go, Java / Spring, REST APIs, WebSocket, PostgreSQL

UX & Product: Figma, UX Research, Interaction Design, Usability Testing, Prototyping

Quality & Accessibility: WCAG 2.1, Accessibility, Vitest, Jest, Cypress, Web Application Security

Development & AI: Git, CI/CD, GCP, Docker, AI-Assisted Development (Codex, Claude, Kimi)

EDUCATION

AP Degree in Multimedia Design

UNIVERSITY COLLEGE OF NORTHERN DENMARK

SEP 2020 - JUN 2022

LANGUAGES

Hungarian (Native) | English (Professional) | Danish (Limited working proficiency)
