SUMMARY

UX & Frontend Engineer building complex React and TypeScript products since 2022. Combines UX research, interaction design, and frontend engineering to take workflows from exploration to production, with a focus on reusable design systems, accessibility, and API integration.

EXPERIENCE

UX & Frontend Engineer

AXON NETWORKS

OCT 2022 - PRESENT

- Deliver React/TypeScript workflows for AXON's OaaS platform, from UX exploration to production; AXON reports 30+ operators and 97M+ managed users across its platforms.
- Develop network diagnostics and performance-monitoring interfaces for network equipment, including health checks, historical trends, and detailed snapshot views.
- Designed a configurable D3.js analytics workspace where users arrange graphs and save, search, restore, and manage personalized views.
- Create reusable components and design-system patterns across a modular frontend architecture using Webpack, Module Federation, and single-spa.
- Deliver WCAG-aligned accessibility and automated quality coverage across semantics, keyboard and focus behavior, responsive and 200% text reflow, and interaction tests.
- Work beyond the frontend across REST and WebSocket integrations, Node.js/Express APIs, and Java/Spring services, partnering with product, QA, analytics, and engineering to turn technical requirements into shipped solutions.

UX Designer Intern

MAPSPEOPLE

JAN 2022 - APR 2022

- Conducted UX research and built interactive prototypes for the MapsIndoors CMS, translating findings into product improvements.
- Contributed design-system patterns, responsive interface work, documentation, and developer handoff across desktop and mobile experiences.
- Delivered Jira-managed product tasks with engineers, balancing interaction detail, accessibility, and SaaS implementation constraints.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS, Redux, D3.js, Next.js, Svelte

Architecture: Module Federation, single-spa, Webpack, Design Systems

Backend & Integration: Node.js / Express, Java / Spring, REST APIs, WebSocket, PostgreSQL

UX & Product: Figma, UX Research, Interaction Design, Usability Testing

Quality & Security: WCAG Accessibility, Jest, Cypress, Web Application Security

Delivery & AI: Git, CI/CD, GCP, Docker, Large Language Models (LLMs)

EDUCATION

AP Degree in Multimedia Design

UNIVERSITY COLLEGE OF NORTHERN DENMARK

SEP 2020 - JUN 2022

LANGUAGES

Hungarian (Native) | English (Professional) | Danish (Limited working proficiency)
